

GEMÜ 1230

Electrical position indicator

Features

- Position feedback via microswitch, option with LED indication of end position
- Adjustable switch point tolerances via threaded spindle
- Can be fitted to GEMÜ valves or third-party actuators
- UL approval available

Description

The GEMÜ 1230 electrical position indicator is suitable for mounting to pneumatically operated linear actuators. The position of the valve spindle is reliably electronically detected and reported via microswitches through play-free and non-positive mounting. The GEMÜ 1230 has been specially designed for valves with a stroke of 2 to 20 mm.

Technical specifications

- **Ambient temperature:** -20 to 60 °C
 - **Linear measuring range :** 2 to 20 mm
 - **Supply voltages:** 10 - 30 V DC | 250 V AC
 - **Protection class:** IP 65
 - **Electrical connection type:** M16 cable gland | M12 plug
 - **Switch types:** Microswitch
 - **Conformities:** CSA | EAC | UL Recognized
- Technical data depends on the respective configuration

GEMÜ CONEXO

The interaction of valve components that are equipped with RFID chips and an associated IT infrastructure actively increase process reliability.

Thanks to serialization, every valve and every relevant valve component such as the body, actuator or diaphragm, and even automation components, can be clearly traced and read using the CONEXO pen RFID reader. The CONEXO app, which can be installed on mobile devices, not only facilitates and improves the "installation qualification" process, but also makes the maintenance process much more transparent and easier to document. The app actively guides the maintenance technician through the maintenance schedule and directly provides him with all the information assigned to the valve, such as test reports, testing documentation and maintenance histories. The CONEXO portal acts as a central element, helping to collect, manage and process all data.

Ordering

GEMÜ Conexo must be ordered separately with the ordering option "CONEXO" (see order data).

Order data

The order data provide an overview of standard configurations.

Please check the availability before ordering. Other configurations available on request.

Note: Mounting kit 1230 S01 Z...dependent on valve type. Please order separately. Data required on valve type, DN, control function and actuator size.

For possible combinations see availability table.
