

Advanced Technologies for Clean Spaces

Cleanroom Furnishings

SPS CleanTech offers a wide range of Clean Space furnishings designed for use in a variety of applications around the world such as Cleanrooms, Life Science, Healthcare, Food & Beverage facilities, Commercial Kitchens, and Schools. We work with several different world-class partners that design and build furniture and fixtures that deliver reliability and performance, along with ergonomic and stylish designs. These products are designed to withstand the harshest cleaning solutions and processes to ensure a long life of hygienic performance.

- Available in Stainless Steel (304 or 316L) or Plastic (Polypropylene or PVC)
- Designs that are assembled on-site or ship with fully welded construction
- Standard designs or custom built to unique customer requirements
- Constructed for long life and durability
- Ergonomically designed for clean space applications
- Edges can be flat, rolled, bull nose or marine edge
- Solid surfaces or perforated
- Mobile devices use non-marking casters
