

"EM" 90mm Sanitary Pressure Gauge

Introduction

The best just got better! With our re-designed 90mm sanitary pressure gauge, Anderson-Negele has raised the bar relative to performance, reliability, and ease of use.

Customers in the Life Sciences market will recognize at a glance that we've maintained all our unique features like all-welded construction, electro-polished wetted parts, and standard calibration certifications. They'll also appreciate the new, compact profile that fits virtually anywhere while still maximizing readability. But what really sets this gauge apart is the new offset adjustment that comes as a standard feature on every Life Science series gauge. Rear-mounted and unobtrusive, we even provide a special tool for the optional span adjustment so it's tamper-proof.

Complete specifications and ordering information are available on the reverse. For more information contact our Customer Service Department at 1-800-833-0081, or visit our website at www.anderson-negele.com.

Features

- The industry's only externally adjustable span and offset
- Designed specifically for SIP and autoclave applications
- Lowest/most narrow profile of any sanitary gauge
- Custom laser etched markings available
- Available clean for oxygen service

Applications

- Fermentation
- Filtration
- All sanitary pressure dependent processes

Specifications

TYPICAL PERFORMANCE

Over-Range Capability: At least 25% over range
 Calibrated Accuracy: ± .75% F.S. from 10-90% of range
 Repeatability: ± .25% of full scale
 Linearity: ±.25% of full scale
 Hysteresis: ±.25% of full scale
 Stability: Within specified accuracy for 6 months under normal operating conditions.

Process Temperature Limits: -20° to 300°F (-29° to 149°C) option to 330°F (166°C)
 Ambient Temperature Limits: 40° to 120°F (4° to 49°C)
 CIP Temperature Limit: 250°F (121°C) continuous
 SIP Temperature Limit: 300°F (149°C) continuous
 Autoclave Temperature Limit: 300°F (149°C) for one hour (unfilled case only)
 Temperature Effect: Less than 0.06 psi per 10°F change in process or ambient temperature
 Storage Temperature Limits: -22°F to 195°F (-30°C to 91°C) -22°F to 250°F (-30°C to 121°C)*

* Vented Case

CONSTRUCTION/FINISH

All Product Contact Surface (Diaphragm and fitting): Welded 316L stainless steel, electropolished. Maximum Ra = 8 microinches (.2 microns).
 Bourdon Tube/Socket Construction: Bronze bourdon/brass socket with silver soldered connections.
 Movement Mechanism: Brass.
 Case/Stem: Welded 304 stainless steel (polished).
 Dial: Adhesive-backed printed Mylar in various scales, 90mm diameter min.
 Lens/Dial Plate: Corrosion resistant polysulfone able to withstand 325°F
 Optional lens: UV Stabilized polycarbonate (not suitable for autoclave)
 Bezel: 304 stainless steel, polished, compression formed to case (non-removable).

Viewing Angle: 100 degrees minimum.
 Clean for Oxygen Service: Optional, product contact surfaces prepared per Compressed Gas Association G4.1

OPERATIONAL

Actuating Fill: 100% mineral oil. Meets FDA requirements (21CFR, 172.878 and 178.3620(a))
 Neobee-20, 80/20 glycerine/H2O optional
 Optional, glycerine 100% USP Food Grade.
 Case Fill: Mechanical Dampening: Optional. Standard and case filled gauges dampened to 25% to 50%. Mechanical dampening dampens 50% to 80% of pressure variations. Tamper resistant adjustment, +/-5% of span. Non interactive with span. External adjustment integrally located on back of case. Externally accessible with tool (AIC #4523800000) through rear of case. Adjustment up to +/-5% of span.
 Re-Zero Adjustment:
 Re-Span Adjustment:
 Standards: Designed and manufactured to sound engineering practices in accordance with Article 3.3 of the PED 97/23/EC.
 Designed and tested in accordance with ASME B40.100. NEMA 4X, IP-66 CSA B51-03, CRN# CSA0F9754.5C CGA G4.1 (OPTIONAL)
