Hose Racks and Carts

Protect your hoses. Improve organization. Support a cleaner processing environment.

Proper hose storage plays an important role in maintaining the working life and sanitary condition of hose assemblies. Our hose drying racks and carts are designed to help End Users organize, drain, and store hoses in accordance with manufacturer recommendations.

By keeping hose assemblies off the floor and reducing clutter, these solutions support cGMP compliance while contributing to a safer, cleaner, and more efficient workspace. Hose racks and carts are a simple, effective solution for better hose organization and longer hose assembly life.

- Extends hose working life and ensures 100% drainage
- Provides designated Hose storage area eliminating clutter
- Conforms to cGMP, FDA and 3A standards
- Allows storage of process hoses, tri-clamps and gaskets in one convenient location
- Available in wall-mounted or mobile cart designs
- 304 or 316L Stainless Steel
- Standard and custom designs are available

Contact Sentinel Process Systems, Inc. for hose racks and carts that support proper hose storage, drainage, organization, and handling.

Hose Racks and Carts

Half Moon Wall-Mounted Rack

A popular solution for process hose storage and drying, the Half Moon Wall-Mounted Rack features a 6″ deep curved shelf that holds multiple hoses at one time. Integrated hanging rods provide convenient storage for tri-clamps, gaskets, and related components.

Slotted Wall-Mounted Racks

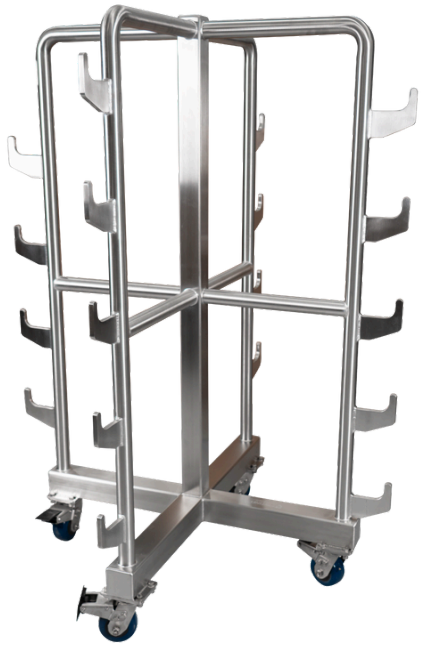

Slotted Wall-Mounted Racks allow tri-clamp fittings to slide securely into individual slots so hoses can hang vertically for proper draining. Multiple hanging rods help keep clamps, gaskets, and hose components organized and accessible.

Mobile Hose Racks

Mobile Hose Racks make it easy to transport process hoses between rooms or processing areas. Available in standard and custom designs, these racks can accommodate a large number of hoses and may include shelving, and hanging rods for organized component storage.
